Glazed bricks have been an integral part of the architectural landscape for thousands of years.

Their distinct characteristics set them apart from other brick products and their impervious surface makes them extremely durable and resistant to staining, perfect for high traffic areas.

Available in a wide variety of colours, finishes and textures.

The only limitation is your imagination.

Photo: The Ishtar Gate, part of the Walls of Babylon.
Constructed around 575 BCE using glazed bricks.

Brick colour: Zinc

METALLIC

This modern and innovative range offers an ultra-premium finish.

The iridescence effect of this glaze is produced by the reflective metallic sheen which can subtly change colour depending on the light and surface texture, adding stunning highlights to a building.

BESPOKE FINISHES

On a glazed brick the texture will have a significant influence on a viewers' perception of colour and tone.

Texture plays an integral role in the aesthetic of a façade and can often be just as important as the colour itself!

We offer several textures from our traditional smooth through to our heavier textured glazed which are available in any colour and finish.

RAL COLOURS

Our glazed range is available in any RAL colour, with the additional option of creating textured, metallic and matt finishes.

This allows architects and designers the opportunity to create individual concepts and design unique colour palettes.

FACTORY

Manufactured to the highest quality with an exceptional non-scratch thick glaze, creating amazing iridescent and matt finishes.

- Manufacturing since 1886
- CE marked
- Stain resistant
- 100 year guarantee
- All British standard & non-standard sizes available
- High-quality world-renowned facing bricks
- Exceptionally strong & robust glazes & finishes
- Retains vibrant colour year after year
- Algae resistant
- No efflorescence

TECHNICAL INFORMATION

Dimensions:

220 mm x 105 mm x 48 mm
215 mm x 102.5 mm x 65 mm
215 mm x 102.5 mm x 73 mm

(Other sizes available including linear)

Dimensional tolerances:

T2-R2

Average compressive strength (bed face):

≥ 100 N/mm²

Water absorption:

≤ 4.5 %

Durability against freeze-thaw:

F2

Active soluble salt content:

S2

Reaction to fire:

Class A1

Bond strength (fixed value from EN 998-2):

0.15 N/mm²

Direct airborne sound insulation:

1450 kg/m³

Equivalent thermal conductivity:

0.54 W/m.K [10,dry]

Dangerous Substances:

Nil dangerous substances
